Journal of MOLECULAR GRAPHICS

VOLUME 9, 1991

AUTHOR/TITLE INDEX

Abstracts from the Molecular Graphics Society Workshop on Desktop Molecular Visualization, 40
Abstracts from the Workshop on Aspects of Molecular Graphics, 53
Allen, F. H.: *See* Poirrette, A. R., 203
Arteca, G. A., Tapia, O. and Mezey, P. G. Implementing knot-theoretical characterization methods to analyze the backbone structure of proteins: Application to CTF L7/L12 and carboxypeptidase A inhibitor proteins, 148

Barlow, D. J.: *See* Lawrence, S. M., 218
Barth, A.: *See* Brandt, W. 122
Belhadj-Mostefa, K., Poet, R. and Milner-White, E. J. Displaying inter-main chain hydrogen bond patterns in proteins, 194
Brandt, W., Wahab, M., Schinke, H., Thondorf, I. and Barth, A. HAMOG: Molecular graphics program for chemistry, biochemistry, molecular biology and enzyme research, 122

Cense, J.-M. Exact visibility calculation for space-filling molecular models, 191
Chelvanayagam, G. and McKeaig, L. Stereo viewing on the PC/AT with EGA graphics, 111
Chun, P. W.: *See* Jou, W. S., 237
Clark, D. E., Willett, P. and Kenny, P. W. Pharmacophoric pattern matching in files of three-dimensional chemical structures: Use of smoothed bounded distances for incompletely specified query patterns, 157
Clayworth, D.: *See* Livingstone, D. J., 115
Couch, G. S.: *See* Ferrin, T. E., 27

Darden, T., Johnson, P. and Smith, H. MULTI: A shared memory approach to cooperative molecular modeling, 18
Deléage, G.: *See* Geourjon, C., 188
Dietrich, A. and Maigret, B. Program for the visualization of inorganic crystals, 85
Driessen, H. P. C.: *See* Wang, D., 50

Ferrin, T. E.: *See* Huang, C. C., 230
Ferrin, T. E., Couch, G. S., Huang, C. C., Pettersen, E. F. and Langridge, R. An affordable approach to interactive desktop molecular modeling, 27
Flower, D. R. Improved ribbon-drawing programs, 257
Folkers, G.: *See* Krug, M., 119
Fox, M.: *See* Kendrick, J., 182

Gaber, B. P. Introduction: How big is your desktop?, 2
Garavelli, J. S. Molecular modeling on the Commodore Amiga, 24
Geourjon, C., Deléage, G. and Roux, B. ANTHEPROT: An interactive graphics software for analyzing protein structures from sequences, 188
Gertner, B. J., Whitnell, R. M. and Wilson, K. R. Fast space-filling molecular graphics using dynamic partitioning among parallel processors, 139
Gund, T. M.: *See* Spivak, C. E., 105

Hazout, S.: *See* Tuffery, P., 175
Henkel, J. G. PC-based molecular modeling in the classroom: Applications to medicinal chemistry and biochemistry, 11
Hermsmeir, M.: *See* Spivak, C. E., 105
Hesketh, G.: *See* Livingstone, D. J., 115
Huang, C. C.: *See* Ferrin, T. E., 27
Huang, C. C., Pettersen, E. F., Klein, T. E., Ferrin, T. E., and Langridge, R. Conic: A fast renderer for space-filling molecules with shadows, 230

Johnson, P.: *See* Darden, T., 18
Jones, D. T. The application of fractal clustering to efficient molecular ray tracing on low-cost computers, 249
Jou, W. S. and Chun, P. W. Molecular mechanics of the formation of cholic acid micelles, 237

Kendrick, J. and Fox, M. Calculation and display of electrostatic potentials, 182
Kenny, P. W.: *See* Clark, D. E., 157
Klein, T. E.: *See* Huang, C. C., 230
Krug, M. and Folkers, G. ADAPTU: Animated dynamics analysis program at Tübingen University, 119

Langridge, R.: *See* Ferrin, T. E., 27; Huang, C. C., 230
Lawrence, M. J.: *See* Lawrence, S. M., 218
Lawrence, S. M., Lawrence, M. J. and Barlow, D. J. VESICA: Computer graphics modeling of lipid vesicles, 218
Liang, R. F.: *See* Spivak, C. E., 105
Livingstone, D. J., Hesketh, G. and Clayworth, D. Novel method for the display of multivariate data using neural networks, 115

Maigret, B.: *See* Dietrich, A., 85
McKeaig, L.: *See* Chelvanayagam, G., 111

Mezey, P. G.: *See* Arteca, G. A., 148
Milner-White, E. J.: *See* Belhadj-Mostefa, K., 194
Mornon, J. P.: *See* Tuffery, P., 175
Müller-Plathe, F.: *See* Wilton, A., 127

Ortí, E.: *See* Torrens, F., 254

Pattabiraman, N. and Ward, K. B. Crepe-ribbon representation for protein structures: Comparison of phospholipases A_2, 3
Pettersen, E. F.: *See* Ferrin, T. E., 27; Huang, C. C., 230
Poet, R.: *See* Belhadj-Mostefa, K., 194
Poirrette, A. R., Willett, P. and Allen, F. H. Pharmacophoric pattern matching in files of three-dimensional chemical structures: Characterization and use of generalized valence angle screens, 203
Probst, M. M. On the use of a general-purpose CAD program for molecular graphics, 226

Ramos, M. J. Model structure for the human blood coagulation agent β-factor XIIa, 91
Rippmann, F. and Taylor, W. R. Visualization of structural similarity in proteins, 169
Roux, B.: *See* Geourjon, C., 188

Sánchez-Marín, J.: *See* Torrens, F., 254
Schinke, H.: *See* Brandt, W., 122
Shang, W.-C.: *See* Spivak, C. E., 105
Smith, H.: *See* Darden, T., 18
Smith, W.: *See* Wilton, A., 127
Sneddon, S. F.: *See* Sokalski, W. A., 74
Sokalski, W. A. and Sneddon, S. F. Efficient method for the generation and display of electrostatic potential surfaces from *ab-initio* wavefunctions, 74
Spivak, C. E., Waters, J. A., Yadav, J. S., Shang, W.-C., Hermsmeier, M., Liang, R. F. and Gund, T. M. (±)-Octahydro-2-methyl-*trans*-5(1*H*)-isoquinolone methiodide: A probe that reveals a partial map of the nicotinic receptor's recognition site, 105

Tapia, O.: *See* Arteca, G. A., 148
Taylor, W. R.: *See* Rippmann, F., 169
Thondorf, I.: *See* Brandt, W., 122
Tickle, I. J.: *See* Wang, D., 50
Toma, K. Number of residues in a sphere around a certain residue can be used as a hydrophobic penalty function of proteins, 78
Torrens, F., Ortí, E. and Sánchez-Marín, J. Improved AMYR program: An algorithm for the theoretical simulation of molecular associations, including geometrical and

topological characterization of the dimers, 254
Tuffery, P., Vaney, M. C., Mornon, J. P. and Hazout, S. FORME: An interactive package for protein backbone deformation, 175

Vaney, M. C.: *See* Tuffery, P., 175

Wahab, M.: *See* Brandt, W., 122

Wang, D., Driessen, H. P. C., Tickle, I. J. MOLPACK: Molecular graphics for studying the packing of protein molecules in the crystallographic unit cell, 50
Ward, K. B.: *See* Pattabiraman, N., 3
Waters, J. A.: *See* Spivak, C. E., 105
Whitnell, R. M.: *See* Gertner, B. J., 139
Willett, P.: *See* Clark, D. E., 157; Poirrette, A. R., 203

Wilson, K. R.: *See* Gertner, B. J., 139
Wilton, A., Müller-Plathe, F. and Smith, W. TEQUILA: Displaying molecular distance maps, 127

Yadav, J. S.: *See* Spivak, C. E., 105

KEYWORDS INDEX

Actinidin, 194
Artificial intelligence, 115

Backbone deformation, 175
Bile salts, 237
Bioisosterism, 11
Bond angle, 203
Bounds smoothing, 157

α-carbon model, 78
Carboxypeptidase inhibitor protein, 148
Chemical and proteolytic digestion, 188
Computer-aided design (CAD), 226
Computer graphics, 24, 226, 257
Conic, 230
Coordination chemistry, 85
CPK modeling, 85
Crystallographic unit cell, 50
Crystal packing, 50
CTF L7/L12 ribosomal protein, 148
Cubic Bezier curve, 191
Cumulative atomic multipole moments, 74

3D raster graphics, 85
Description of secondary and tertiary structures, 3
Desktop molecular modeling, 24, 27
Desktop molecular visualization, 11
Distance constraints, 119
Distance geometry, 157
Drug delivery, 218
Dynamics, 85

Electron density, 182
Electrostatic potential, 74
Electrostatic potentials, 182
Electrostatic potential surface, 74
Enzyme structure and function, 11

β-factor XII*a*, 91
Folding analysis, 148
Fractal clustering, 249

Generalized valence angle, 203
Geometric search, 157
Geometry optimization, 254
Graphic display, 175

α-helix, 194
Homology, 188
Hydrogen bonds, 194
Hydrophobicity, 188
Hydrophobic penalty function, 78

Icosahedral tessellation, 218
Interactive drawing, 191
Interactive molecular graphics, 27

Jones polynomials, 148

Knot-theory, 148

Least-squares fitting, 182
Lipid bilayer, 218
Loop motifs, 194

MDS analysis, 119
Membranes, 218
Micellization, 237
Microcomputers, 249
Modeling, 91
Molecular animation, 11
Molecular associations, 254
Molecular dynamics, 139
Molecular dynamics simulation, 119
Molecular electrostatic field, 122
Molecular electrostatic potential, 122
Molecular graphics, 50, 111, 122, 226, 254
Molecular modeling, 18, 105, 249
Molecular replacement, 50
Multiprocessor algorithms, 139

NeXT workstation, 27
Nicotinic agonist, 105
Nicotinic receptor, 105
Nonlinear mapping, 115

Optimization, 249
ORTEP drawings, 85

Pair potential, 254
Papain, 194
Parallel processing, 18, 139
Pattern recognition, 115
Peptide generation, 122
Personal computer, 111
Pharmacophoric pattern, 203
Pharmacophoric pattern matching, 157
Phospholipid vesicles, 218
Polyhedral approximation, 85
Principal components analysis, 115
Proteins, 175, 194
Protein structure, 3, 78, 148, 188, 257

Quantitative structure-activity relationships, 115
Quantum mechanical properties, 74

1/*R* expansion, 254
Raster graphics, 139, 191, 249
Ray tracing, 249
Receptor map, 105
Residues in a sphere, 78
Reverse phase high pressure liquid chromatography (HPLC), 188
Ribbon drawing program, 257
Ribbon representation, 3

Screenout, 157
Screen search, 157
Secondary structure prediction, 188
Sequence alignment, 91
Sequence homology, 91
Shadow, 230
Shared memory, 18
β-sheet, 194
Silicon Graphics workstation, 182
Similarity of proteins, 169
Smoothed bounded distances, 157
Software development, 226
Space filling, 230
Space-filling molecular models, 139, 191
Sphere, 230
Spherical primitives, 139
Stereochemistry, 11
Stereo graphics, 24
Structure alignment, 169
Structure comparison, 169
Stylized protein picture, 257
Superposition, 122

Tachystoscopic stereo, 111
Three-dimensional substructure searching, 203
Trajectory visualization, 119

Unsupervised learning, 115

Valence angle, 203
Vectorization, 254
Video graphics, 24
Visualization, 249
